EDUCATION

B.E. ECE - Sri Eshwar College of Engineering | **CGPA: 7.83** **2023-2027**
HSC - Rajalakshmi Gengusamy Matric Higher Secondary School | **90.71%** **2021-2023**
SSLC - Rajalakshmi Gengusamy Matric Higher Secondary School | **Pass** **2020-2021**

INTERNSHIP

RAMPEX - MERN Stack Intern **2024**
Developed scalable web applications using React.js with modular components and seamless user interactions. Integrated backend systems using Node.js and MongoDB, while collaborating via GitHub for efficient version control and agile workflows.

RAMPEX - Full Stack Intern **2025**
Built and optimized full-stack applications using Java, Spring Boot, and SQL for robust backend development. Collaborated via GitHub in agile teams to ensure efficient version control and code quality. Implemented scalable APIs and improved automation workflows to enhance overall application performance.

PROJECTS

SLAiGuard – *(ML + Full stack):* **2026**
Developed a full-stack AI-driven SLA monitoring platform that collects real-time system and API metrics to predict service-level breaches. Integrated a machine learning model (Random Forest) for proactive risk prediction and anomaly detection. Implemented role-based dashboards with secure authentication and dynamic alert generation. Enabled intelligent decision-making through predictive analytics and real-time monitoring.

PowerGuard – *(ESP32 + Full stack):* **2025**
Developed an end-to-end IoT-based UPS battery health monitoring system that collects real-time sensor data using ESP32 and streams it to the cloud via ThingSpeak. Programmed embedded firmware in Arduino IDE to process sensor inputs, trigger intelligent buzzer alerts for critical conditions, and ensure reliable Wi-Fi communication. Enabled remote monitoring and data visualization through cloud dashboards, supporting proactive maintenance and improved battery safety.

SilkConnect – (MERN Stack): **2025**
Developed a full-stack silkworm marketplace with secure authentication, product listing with verification, admin validation, and seamless cart, order, and invoice management, enabling transparent direct farmer-to-consumer transactions. Improved efficiency and trust by reducing manual processes and eliminating middlemen.

TECHNICAL SKILLS

- **Programming Languages: C,** Java, Python
- **Core Concepts:** Data Structures and Algorithms (DSA), Database Management Systems (DBMS)
- **Frameworks:** React.js, SpringBoot, Node.js
- **Cloud/Databases:** MySQL, MongoDB, Render, Netlify
- **Developer Tools :** Visual Studio Code, Git, GitHub, Postman

CERTIFICATIONS

- **Learn Java programming - Beginner to Master** - Udemy | 2025 | **[Certificate Link]**
- **Mastering Data Structures and Algorithms using C and C++** - Udemy | 2024 | **[Certificate Link]**
- **SQL (Basic)** - HackerRank | 2024 | **[Certificate Link]**
- **The Joy of Computing using Python** - NPTEL | 2025 | **[Certificate Link]**

ACHIEVEMENTS

- **LeetCode:** Solved 340+ problems | Max Rating: 1,634 | Global Rank: 361,057 | [link]
- **HackerRank:** 4 Star C, 5 Star Java, 2 Star Python | [link]
- **CodeChef:** Problem Solver - Bronze Badge | [link]
- **SkillRack:** Solved 680+ problems | Received 1 certificate | [link]
